

F10 Barn Doors

Main Features

- **Compatible with Aputure F10 Fresnel:** The larger barn door leaves are better for shaping light, particularly from large sources.
- **8-Leaf Adjustable Barn Doors:** Large leaves with additional helper flags aid in precisely shaping light.
- **Includes Safety Cable:** A safety cable and mounting point come fixed to the light for added security.
- **Black Reflector Dish:** The included black reflector features the same drop-in accessory slot as the F10 Fresnel, allowing the F10 Barn Doors to mount directly to any Bowen Mount fixture.
- **Sharper Cuts:** Combined with the larger leaves and the black reflector dish, which minimizes the size of the light source, the F10 Barn Doors, can provide sharper cuts than many other LED barn doors.
- **Compatible with the Bowens Mount LED lights,** such as the Aputure LS 600d Pro, 300d II, 300x, 120d II, etc.
- **Durable Build:** The F10 Barn Doors will withstand the test of time; made from single sheets of black power-coated aluminum and featuring laser-etched logos.

Product Description

The F10 Barn Doors is a light shaping accessory for use with larger Bowens-Mount lights and Fresnel modifiers. The F10 Barn Doors are directly compatible with Aputure's 10" Glass Fresnel Lens Modifier, the F10 Fresnel, as well as the included black reflector dish, or Negative Reflector.

The F10 Barn Doors utilizes a large 8-leaf design to properly cut the light from the large aperture of the F10 Fresnel's 10-inch front element. The black reflector dish that comes with the F10 Barn Doors is ideal for users who desire precise, clean light shaping from their barn doors. By minimizing the light source's size and eliminating any material that would increase the aperture of the LED, this black reflector helps the F10 Barn Doors create even sharper shadows.

Rather than the wire-clamp mechanism used by smaller barn doors typically made for LEDs, the F10 Barn Doors features a heavy-duty drop-in latching mechanism, durable enough for even the most rigorous of film sets. The F10 Barn Doors also feature a safety cable and mounting point pre-mounted onto the barn doors to ensure maximum security.

These barn doors are the industrial-grade accessory for which the modular LED industry has been waiting.

Specifications

Accessory Slot Diameter		332.88mm / 13.106in	
Accessory Mount		Bowens Mount	
Dimensions	Barn Doors w/ Reflector Dish	Closed	406.76*344*173.15mm / 16.014*13.543*6.817in
